## Bible Thought for Today

### A VALUABLE CONTRIBUTION.

In his 'Imple Story of the A. E. F.' now running serially in the Saturday Eventer Post, Mr. George Pattullo is making a most valuable contribution to the history of the late war.

in the army we raised and sent over there on a Quixotic mission.

England and France was to merge the nationality of America with that of their own-each of them striving to overcome the other in this regard. And from beginning to end the more America did the more both nations grumbled for still additional efforts. As the author puts it, the attitude of both countries seemed to be, "Well here is the war; take it and finish it."

The demand was that American troops should the supreme impudence to suggest to the Amerfiedly with the Reitish high command!

It is indeed a good thing that the folks at home were not advised of the real sentiments actuating the representatives of the British and French governments. Our troops would have been ordered home by public sentiment in America and the French and English left to face their fate. Men and women wondered what it was that made our boys return with a different look in their eyes. We can understand it now after reading this memorandum of instructions to French commanders by General Petain regarding their attitude towards American troops attached to their command:

\*\*\* an air of superiority over them should be avoided, a fact which in no way prevents the absolute subordination required by the service, nor carrying out the rules of hierarchy. \* \* In case of necessity French officers should not healtate to exercise their authority. \* \* The American soldier, as did ours formerly, resents manual labor."

Despite the efforts of their commanding offi-

cers the American doughboy evidently had his spirit and pride rudely shocked. He went out on an altruistic mission and found himself merely tolerated as a slave!

God forbid that it will ever ugain be nossible for any historian to write such a story as this "Incide Story of the A. E. F." by Pattolle!

### MR. HOWARD'S GRAVE MISTAKE.

Mr. E. B. Howard of Tillsa, one of the demoeratic candidates for governor, committed a very grave strategic bounder in his Walters speech Monday. The World has not neglected to speak a good word for the Tuiss candidate In the past; it knows him to be a aplended fetline and a loyal Tulian Therefore what follows is in the enlare of sighting a friend rather

In his Walters speech; Mr. Howard ignored all of the vital issues of the campaign to ticinusty attack the John Fields hoom which sopous to have frightened the good man into a pants. Speaking of the overwhelming display of Finish sentiment throughout the state, of the meeting at the moment under way in Oklahome City to draft Fields into the gubernatorial ruce, the Tolks candidate said

"They are preparing to point to perhaps a few mistakes of government and come forth with a self-assinted savior in the person of John Freids. For months they have been preparing the coup."

"They are preparing to point to perhaps a few mistages?" Get that, "perlups a few mistakes?" When Mr. Howard entered the Deta some weeks ago he was quite sure the mistakes many and vital, and he said so; he was sure that democratic combustions in the past had been hought by secret calcula of bankers and special interest representatives who later contrailed the governor, and he said so.

by the people to bring out a candidate who is not financed, who did not even aspire to the office, who wanted nothing so much as to be left alone with his private business, Mr. Howand immediately throws himself into a defensive attitude, ready and willing to condone and deny all that has been done to the people of Oklahoma by the statehouse clique

"They are preparing to point to perhaps a few mistakes," he says of the forces behind the Fields movement. If by his Walters speech the Tulsa man has not written finis to his gubernatorial chances we miss our guess. Because he frankly confesses his willingness to defend extelling conditions, his refusal to admit that there have been any serious mistakes.

What chance have the people of knowing the truth and realizing better government through the election of such a candidate?

### HUMAN NATURE AT ITS WORST.

Those seeking to profit personally out of the efforts of this community to secure a supply of pure, clear water, give a rather diagusting demonstration of human nature at its worst.

However, solution of the problem raised should be approached in a dignified, legal, but vigorous manner. No matter what the temptation for direct Action, legal procedure alone is permissible in settling all such cases.

It is difficult to believe that any court of justice will long consider the attempts being made to hold up the Spavinaw project or extort backsheesh. Let these matters be taken into the courts speedily and pressed vigorously. Right will triumph, and in the end legal procedure at every step will be found to have been the wise thing.

The English oil syndicate, after carefully scanning the development contracts the Russian government offered, decided that it did not want to spend any money in the land of the bear. The Russian people surely have a right to set up any kind of government that pleases them, so long as it does not invade the rights of other governments, but the nationals of other governments who invest under the bolshevik regime should never be permitted to involve their governments in trouble later. They are going in with their eyes open and the stacked against them.

It is not surprising to hear the report that the southwest is leading all other sections in businem activity and recovery. It is in the southwest that the heart of America still beats steadfast and true, here that courage goes hand in hand with ability and both, as yet, refusing to recognize any master at home or abroad.

It was had enough when they kidnaped just plain, ornery citizens suspected of doing something wrong, but now that they have begun to kidnap preachers, thus solling the cloth and harrowing their souls, surely something ought to be done about that?

Editor World: If you are going to draw the line at shop girls, draw it fine. Having no aversion to the class of people who labor for their daily bread, and believing in those who accompilsh as well as those who acquire, think this has gone too far. Christ was a carponer, as was also the father af one of the girls whe struck. The slater-in-law of one, a charming girl with a world of good gray matter under her hal, worked for years in the county office. Two elsters of one, were so-called shop girls, as was also the girl herself. Why draw the line just because you have graduated? Decency and right living ought to be considered before anything else. One of your buds or bugs was with her mother in Manitou, Colo, in 1918. In a restaurant on Ruxton avenue, the respected mamma of said bud or bug drank the juice from her cherries right from the cause dish, a perfectly good way to absorb nourishment, but one not generally approved of. We grow away from such habita as we grow away from work. We marry a man that keeps its from behind the counter, but it behooves the shop girls and buds or bugs to remember the way by which we came. We can't all be lawyers or doctors, and we do need the shop girls, but we can easily dispense with the buds or bugs.

No wrong was ever righted by passing preambles, resolutions of the "buck."

Hez Heck Says:

It, and we can feel we helped make it so.

The motto of France is good for "I wish she were more domestic," and woman, or nation to emulate— "Liberty, Equality, Fraternity"—it covers the earth.
